# DISCLAIMER ON LIMITATION OF LIABILITY

These internal working materials are exclusively intended for informative purposes

In particular, the enclosed information should not be considered as a financial, commercial, investment, legal or any other type of proposal or offer. This information should also not be taken as a call-to-action or an urge to utilize the described services. Any decisions on the use of these materials should be made independently.

## Minting of Coins and Token

Through a so-called minting (technical process), via delivered hardware or hardware which is maintained and serviced for the user in the course of a so-called "In-house Minting", users have the opportunity to mint coins. No liability or guarantees can be assumed for the price development of these coins on crypto exchanges, as price developments of cryptocurrencies are dependent on multiple market influences.

## Time Halving & Sales Halving

With a so-called time halving & sales halving, the total number of minted coins can differ from masternode to masternode (hardware / processor for minting coins). Basically, the later a masternode is activated for the minting process, the lower the total number of minted coins. Therefore, before you consider a possible purchase of a masternode, check whether the number of coins still to be minted by this is fair to your decision.

Cryptocurrency trading is inevitably linked with certain risks, highly speculative, and may lead to partial or total losses in the prices of cryptocurrencies at your disposal. We strongly recommend you to make informed decisions on trading, investing or exchanging cryptocurrencies, relying on professional consultations as needed. Make sure to verify the services offered by the companies indicated in these materials before using their products - installing, registering, purchasing, or using these products for trade and investment purposes.

Please note that the information contained in this presentation is subject to change, which means that important aspects of the project can be changed or abandoned at any time.

## Staking

So-called staking promotions represent blockchain and crypto projects whose indicators allow a high probability of success. However, since these are third-party projects, SAFIR is not responsible for the respective project itself, nor does SAFIR have any influence on whether the respective project is successfully implemented or not. Therefore, no guarantees or promises can be made. We therefore strongly recommend that you inform yourself independently and on your own responsibility before making any decision in this regard.

## Forecasts

Forecasts are based on previous developments. These therefore do not represent any promises or guarantees. Changing market conditions or unforeseeable events which are outside of the company's own degree of effectiveness can influence future developments to a small or large extent.

# RISK ASSOCIATED WITH CRYPTOASSETS

Things to know before buying cryptoassets or related products and services

## Extreme Price Fluctuations

Many cryptoassets suffer from sudden and extreme price fluctuations and are speculative in nature, as their price is often based solely on consumer demand (i.e.. there may be no asset backing the project or other tangible value). You can lose a large amount of money or even all the money you have invested. Extreme price fluctuations also make many cryptoassets unsuitable as a store of value or as a medium of exchange or payment.

## Misleading Information

Some cryptoassets and related products are advertised to the public in an aggressive manner, using marketing material and other information that may be unclear, incomplete, inaccurate or even deliberately misleading. For example, social media advertising may be very brief and focus only on the potential gains and not on the high risks. You should also be wary of social media influencers who typically receive a financial incentive to market certain cryptoassets and related products and services, so their communications may be biased.

## Fraud And Malicious Activity

There are numerous fake cryptoassets and scams whose sole purpose is to deprive you of your money through the use of various techniques, such as phishing.

## Product complexity

Some products offering exposure to cryptoassets are very complex and sometimes have features that can increase the magnitude of losses if adverse price fluctuations occur. Given their complexity, these products are not suitable for many consumers.

## Lack of Protection

Most cryptoassets and the sale of related products or services are not regulated in most jurisdictions. In these cases, you will not enjoy the rights and protections available to consumers of regulated financial services, such as complaint or redress mechanisms.

## Market Manipulation, Lack of Price Transparency and Poor Liquidity

The pricing of cryptoassets and the execution of transactions on the platforms are often not transparent. In addition, the holding of certain cryptoassets is highly concentrated, which may affect prices or liquidity. Therefore, you may not get a fair price or deal when buying or selling cryptoassets, or you may not be able to sell your cryptoassets as quickly as you would like in the absence of a potential buyer. Market manipulation has been reported on multiple occasions.

## Cyber-attacks, Operational Risks and Security Issues

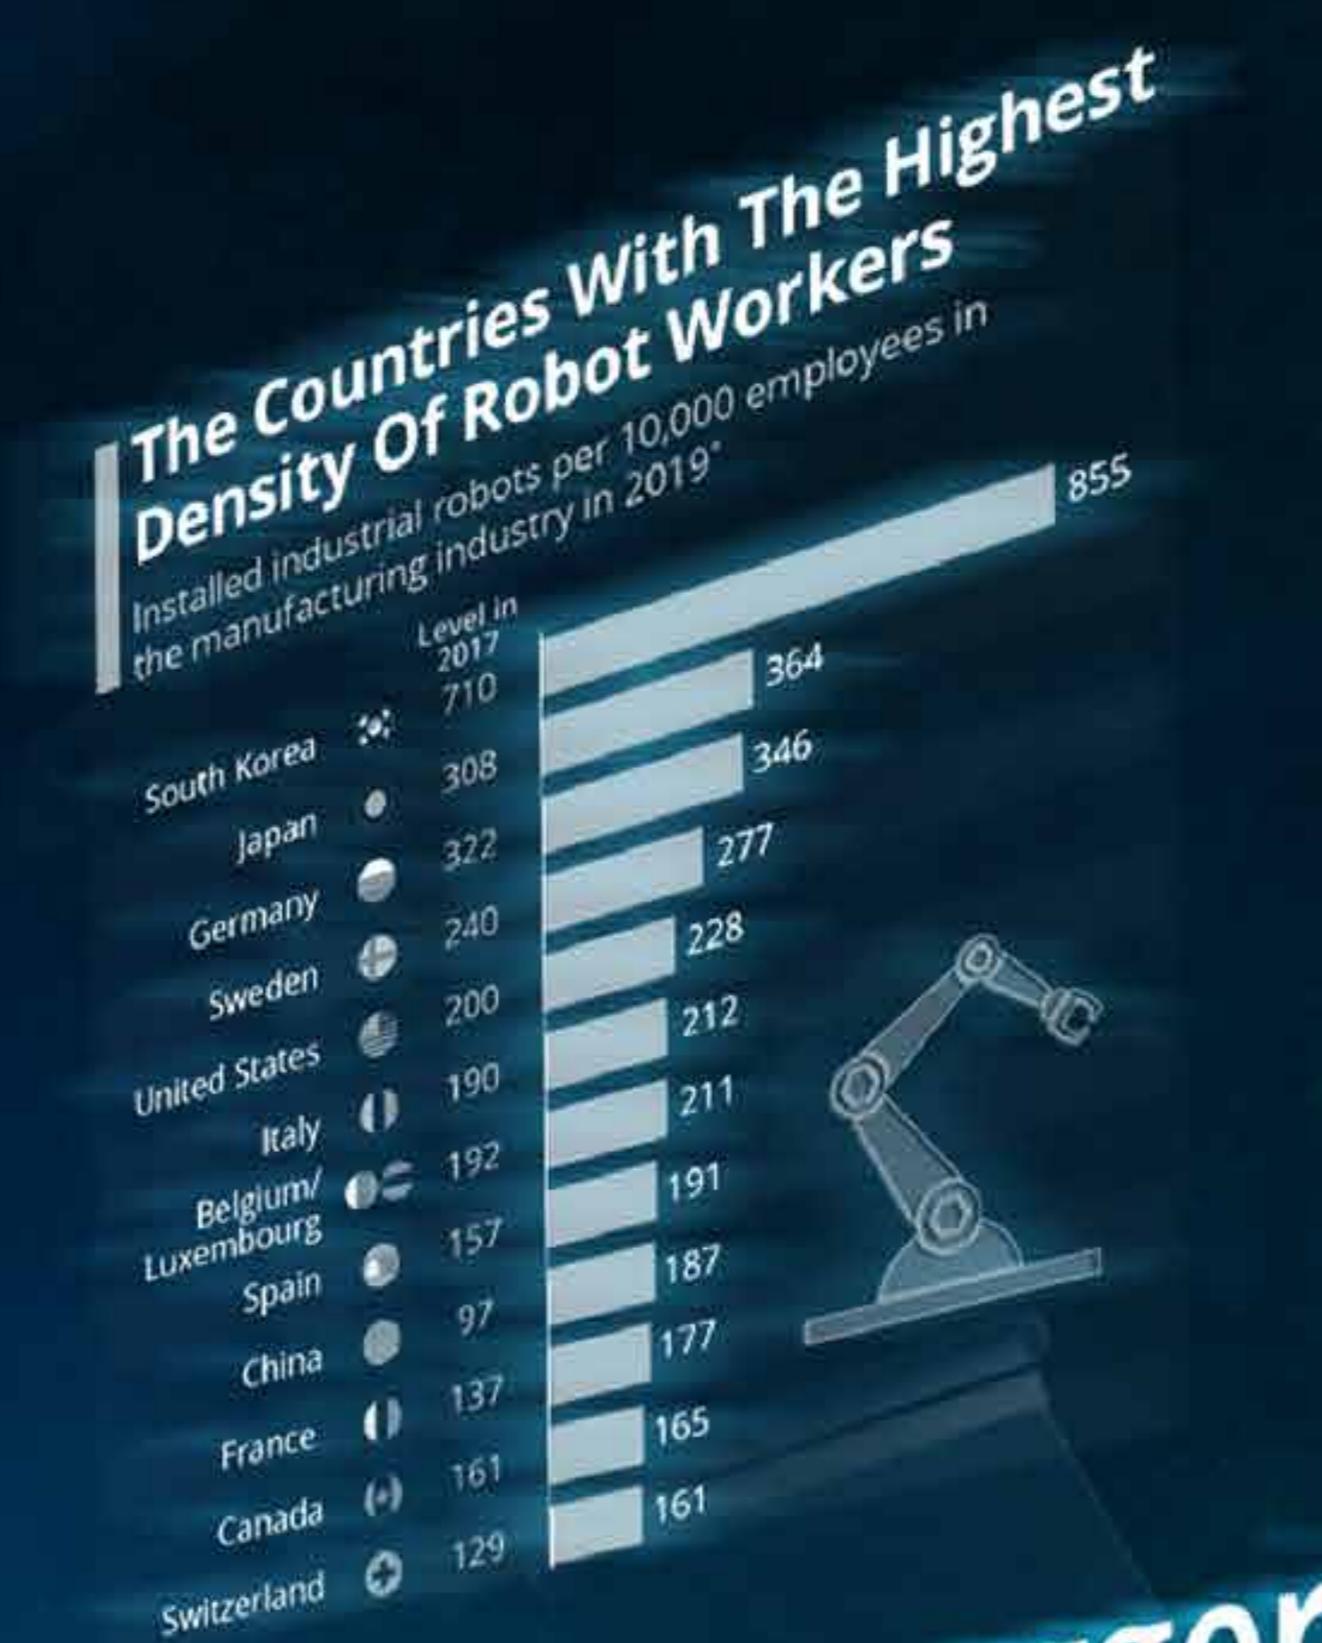

The distributed ledger technology that underpins cryptoassets carries specific risks. Several cryptoassets issuers and service providers, in particular crypto asset exchanges and e-wallet providers, have suffered cyber-attacks and serious operational problems. Many consumers have lost their cryptoassets or suffered losses due to such attacks and service disruptions or lost the private keys with which they access their assets.

The world we were prepared for no longer exists.

Society, is facing one of the biggest job losses in history, as well as one of the most important redistributions of wealth ever seen to the so-called fourth industry revolution.

BUT - in times of greatest upheaval, unimagined new opportunities are also emerging.

# Pandemic Causes Staggering Loss of Working Hours

# Loss of working hours

# THE ZENIQ HUB

The access to your financial sovereignty

## FACTS

- ◆ Hardware-Wallet
- ◆ 7 inch HD touch screen
- ◆ 2 GHz with 6 core processors
- ◆ 250+ GB memory
- ◆ Portal for digital investments
- ◆ Direct access to the decentralized ZENIQ Exchange
- ◆ No KYC required (proprietor & owner)

## ADDITIONAL

- ◆ Each ZENIQ HUB is a ZENIQ masternode
- ◆ Minting function: daily minting of ZENIQ Coins
- ◆ Additional masternodes possible
- ◆ ZENIQ-Coin can be used as platform for tokens

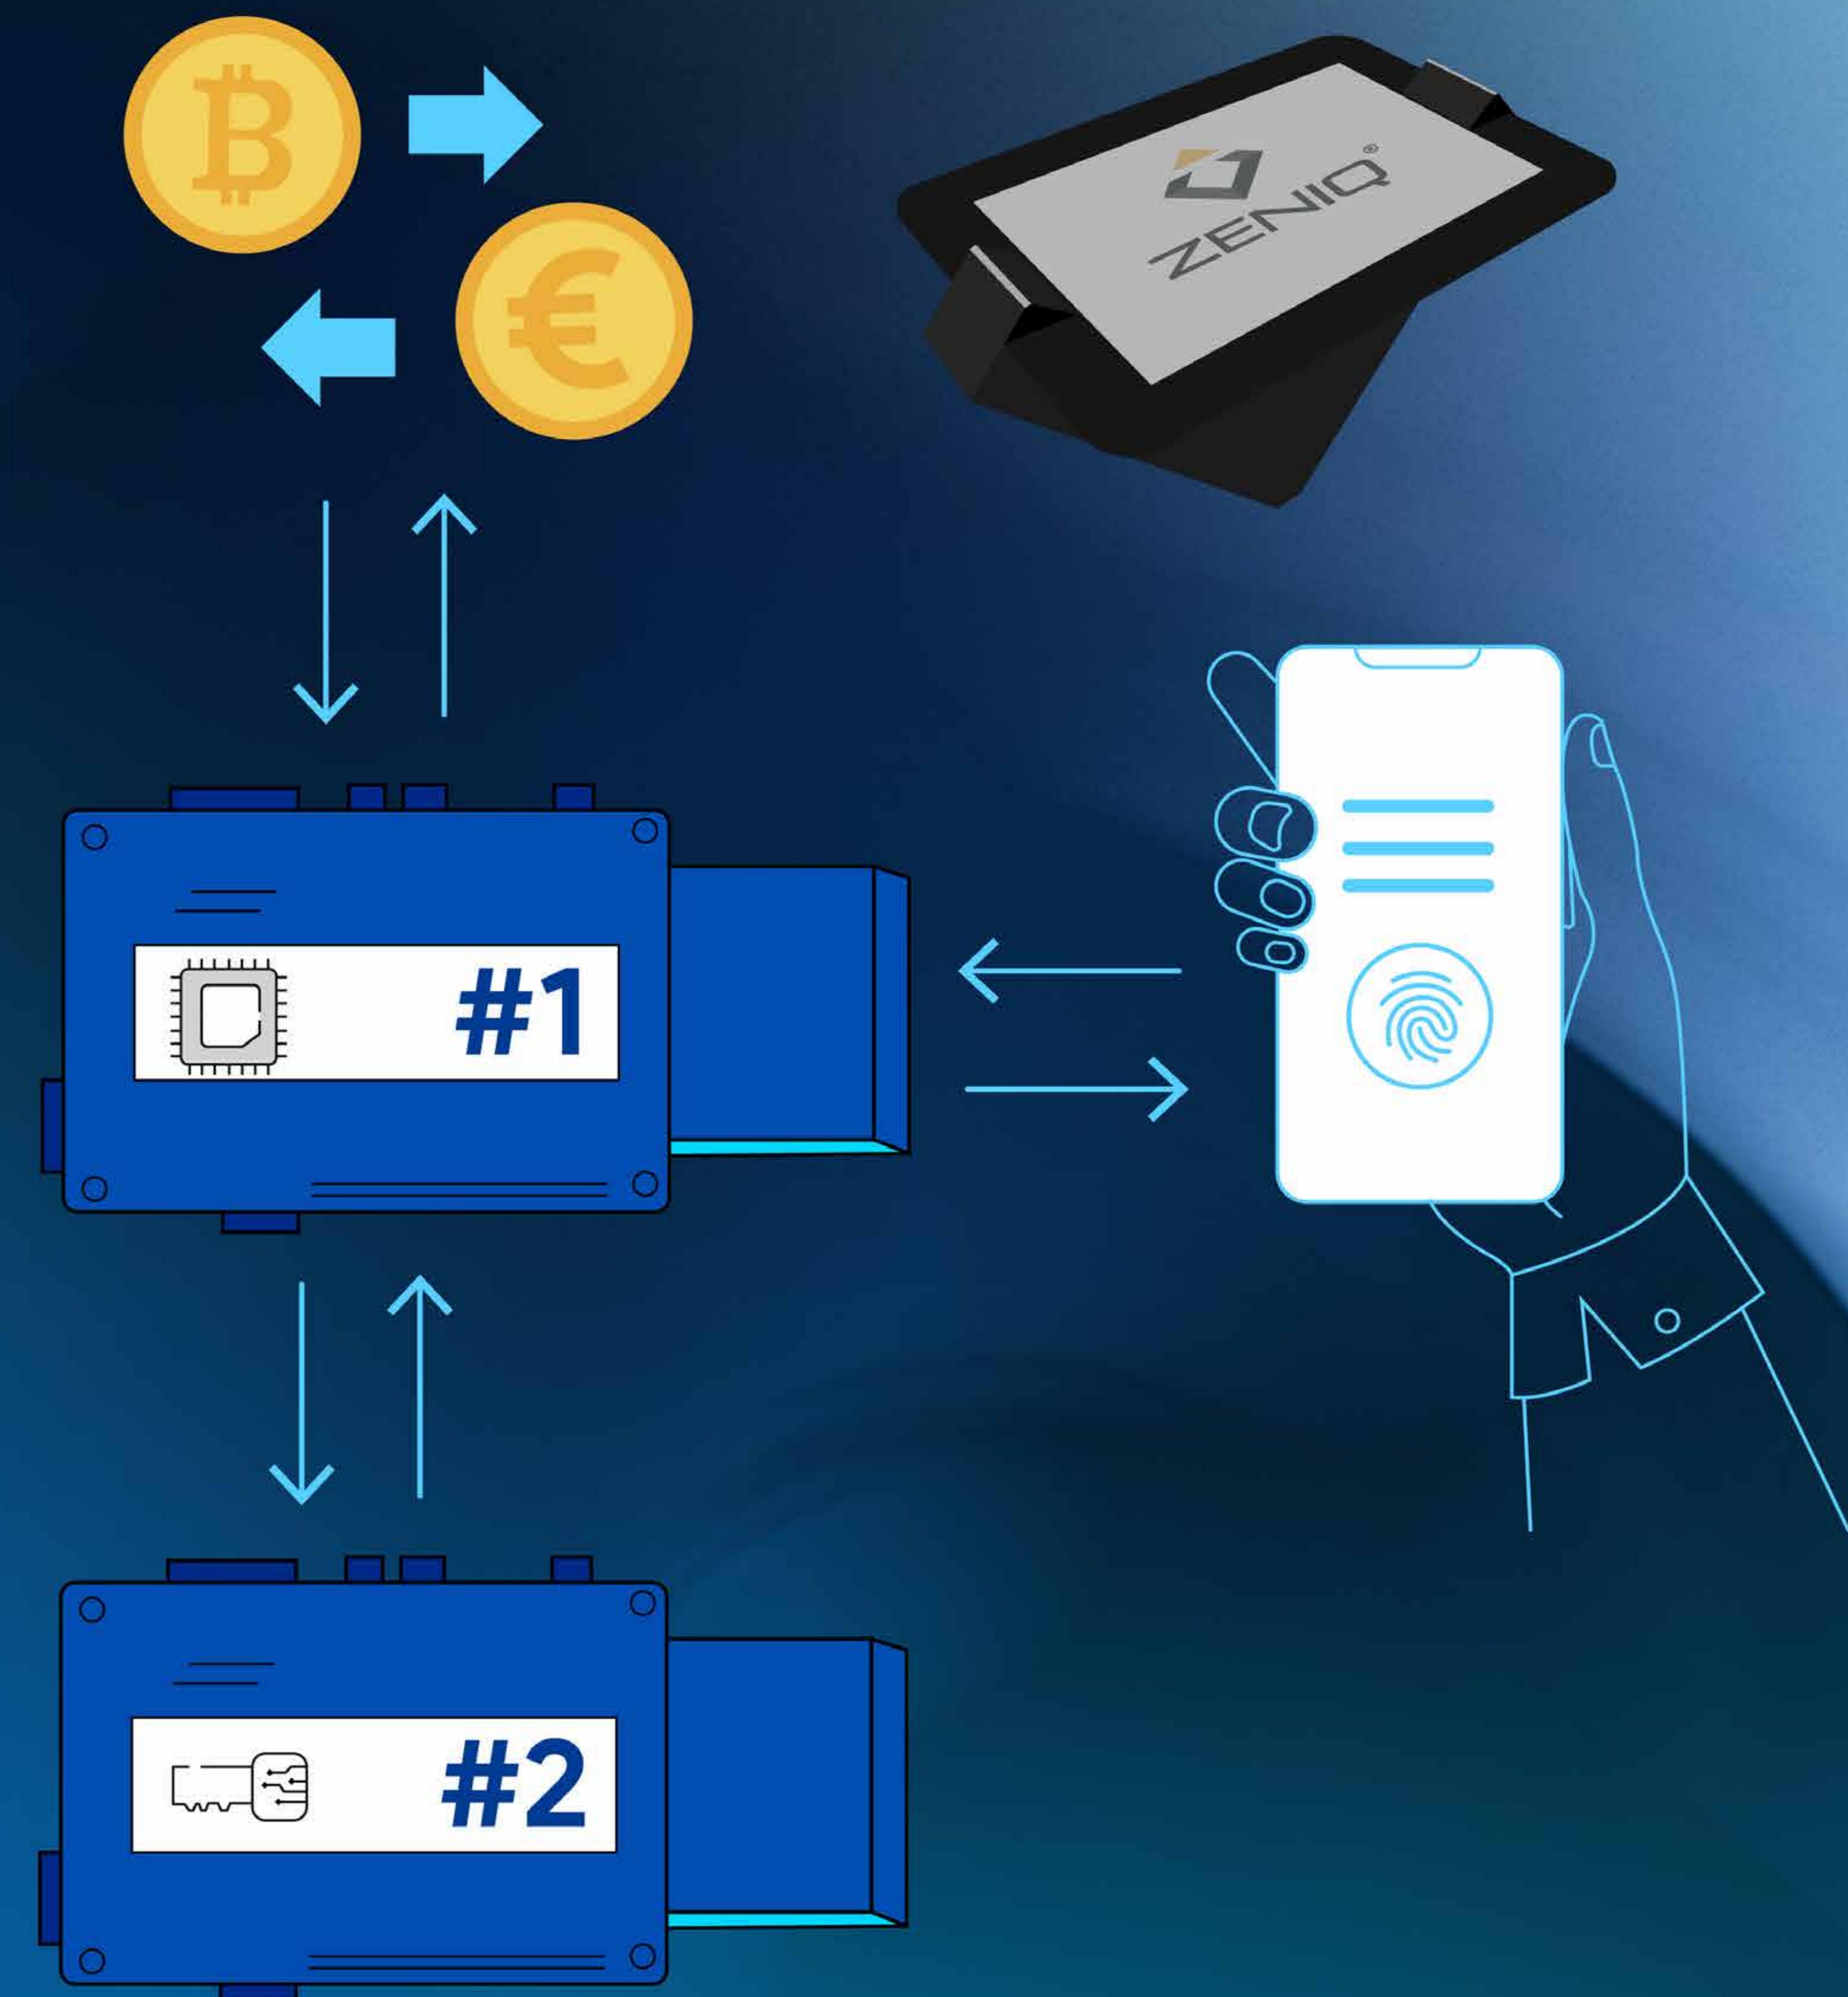

The ZENIQ HUB as  
"access key"

# MAXIMUM SECURITY FOR YOUR DIGITAL ASSETS

## Insurmountable security features

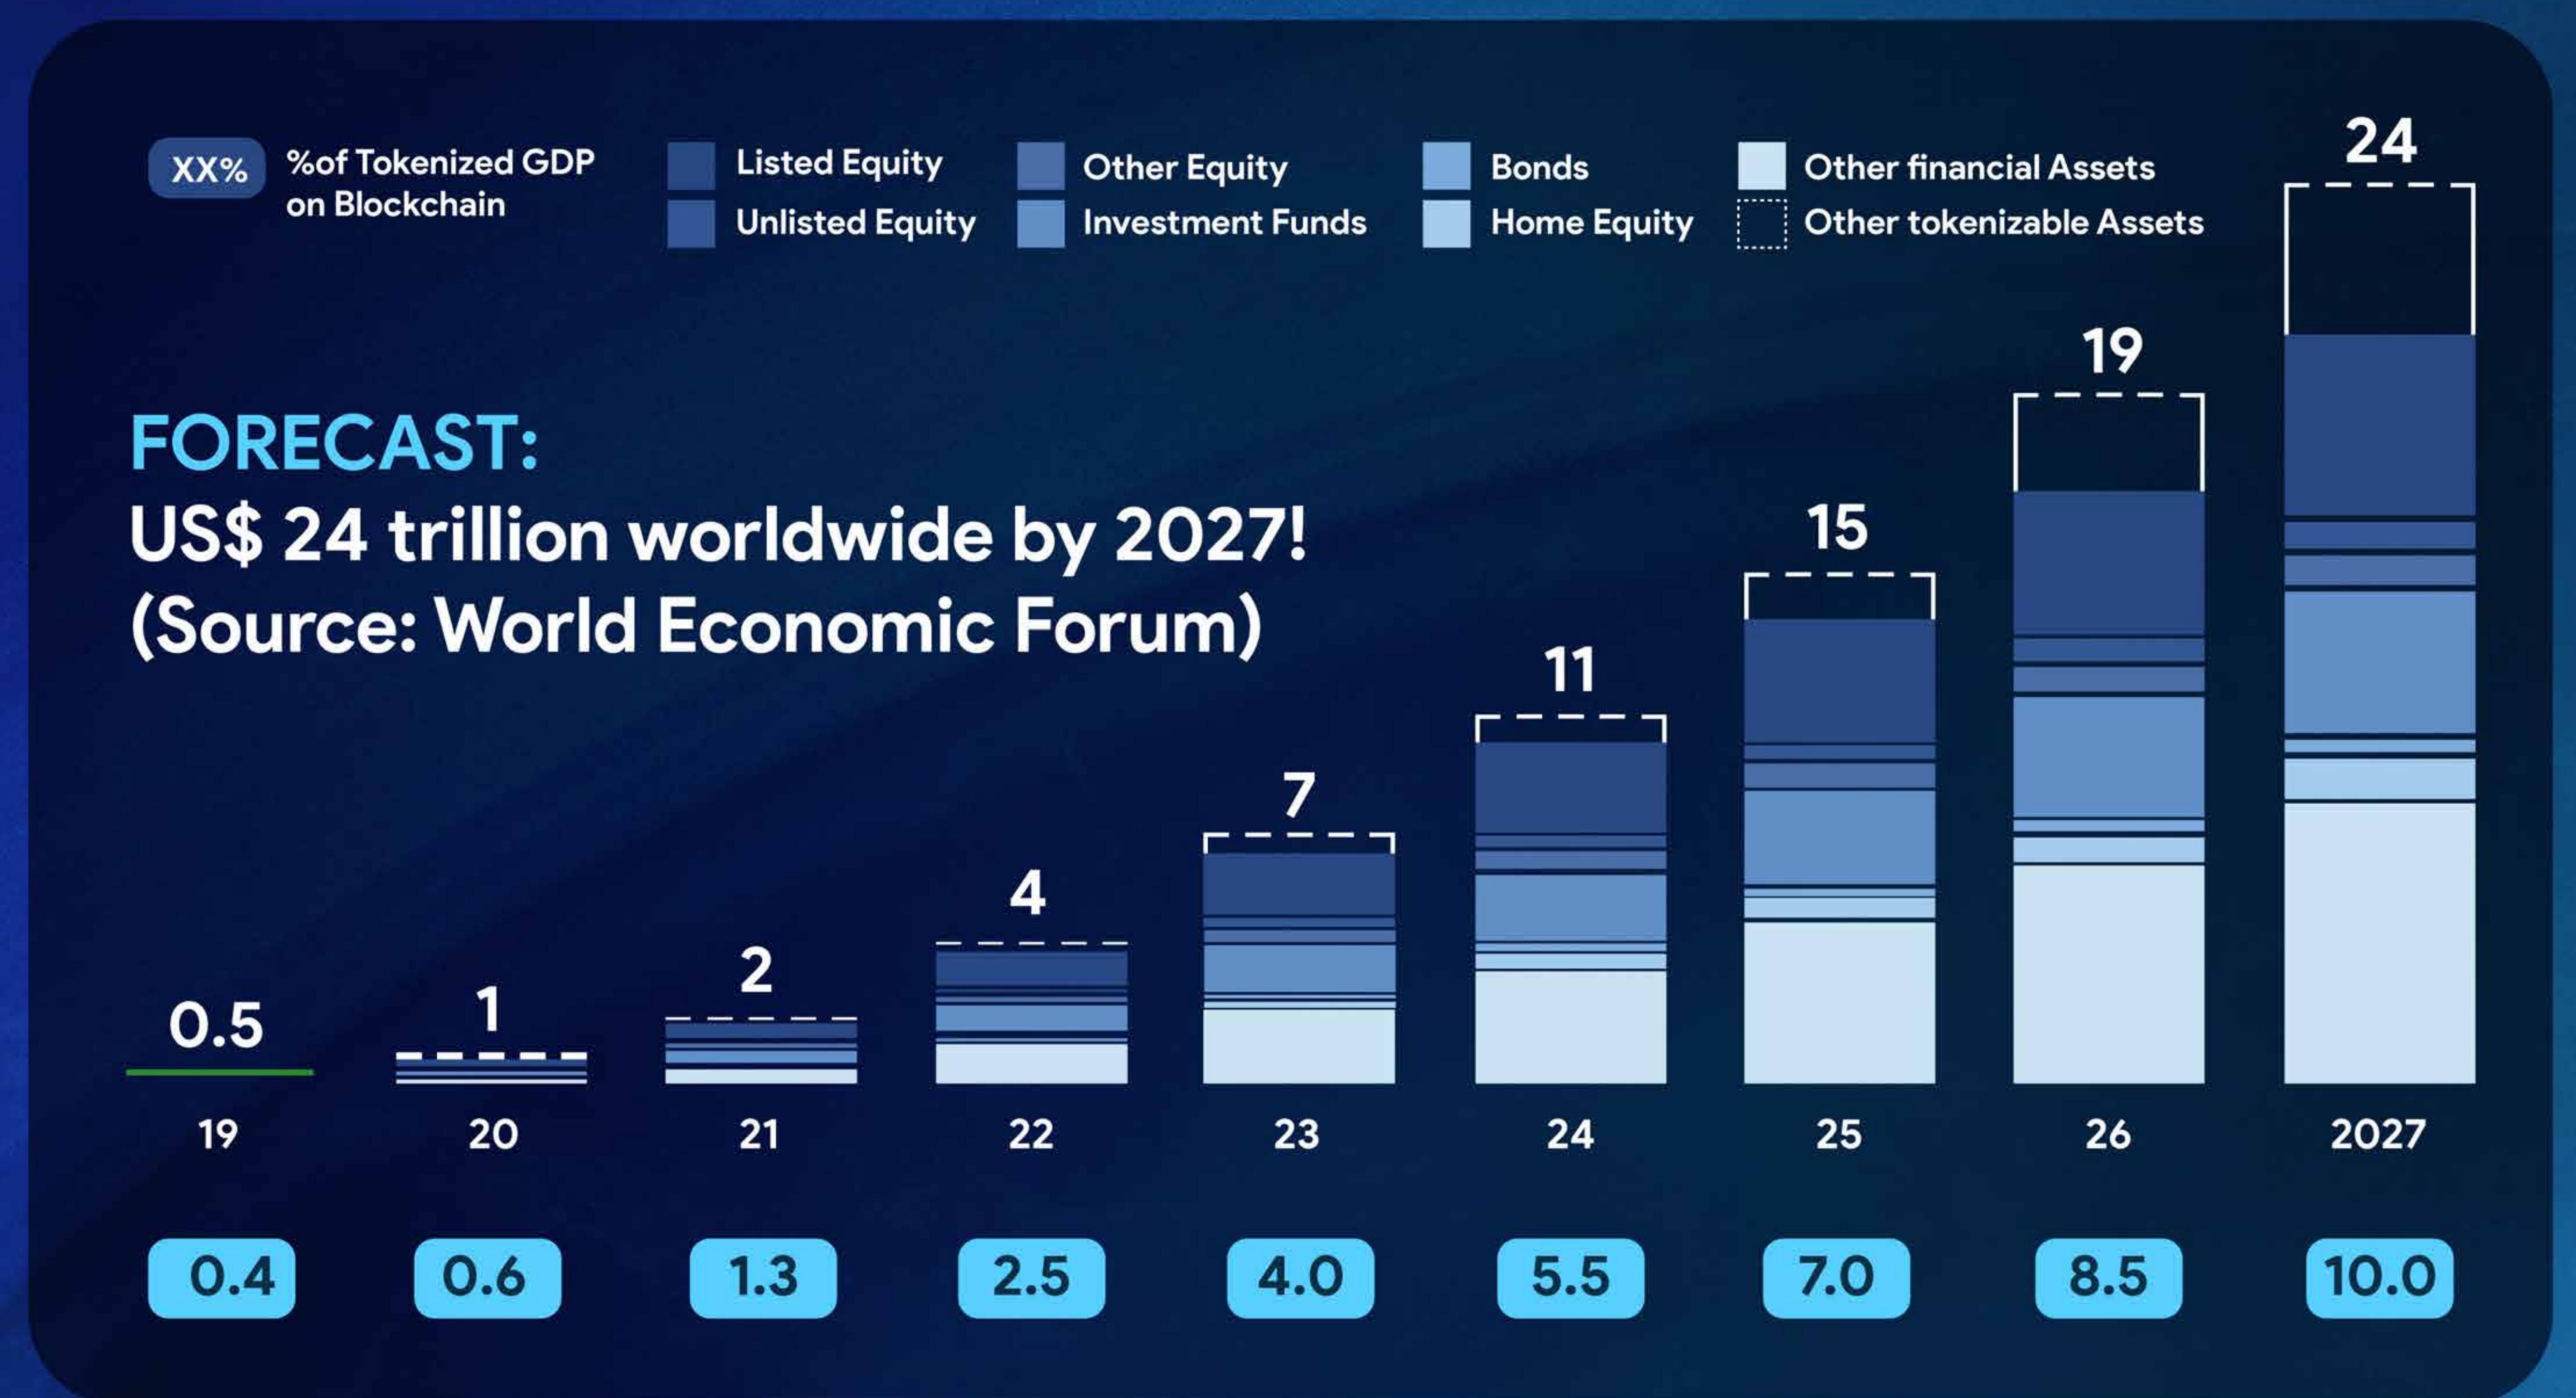

- ◆ Decentralized network
- ◆ Regulation-free (hardware)
  - no BaFin, Finma or SEC license required
- ◆ Own hardware nodes protect the network
  - like Bitcoin
- ◆ No concrete target for cybercrime
- ◆ No third-party authentication
- ◆ ZENIQ HUB generates the private key
- ◆ Buy & sell directly from the ZENIQ HUB

The Key Guard is a technical high-security safe that stores the most valuable possession, the private key, and never communicates externally. The ZENIQ Hub thus creates an unprecedented security standard for crypto assets with its additionally built-in security component.

# BTC & ZENIQ COMPARISON

## Bitcoin Mining

- Bitcoin Mining
- New hardware every 2 to 3 years
- Massive expenses in electricity, insurance and space for the rigs
- No Smartchain, single-project mining
- 7 transactions per second (TPS)

## Community Minting

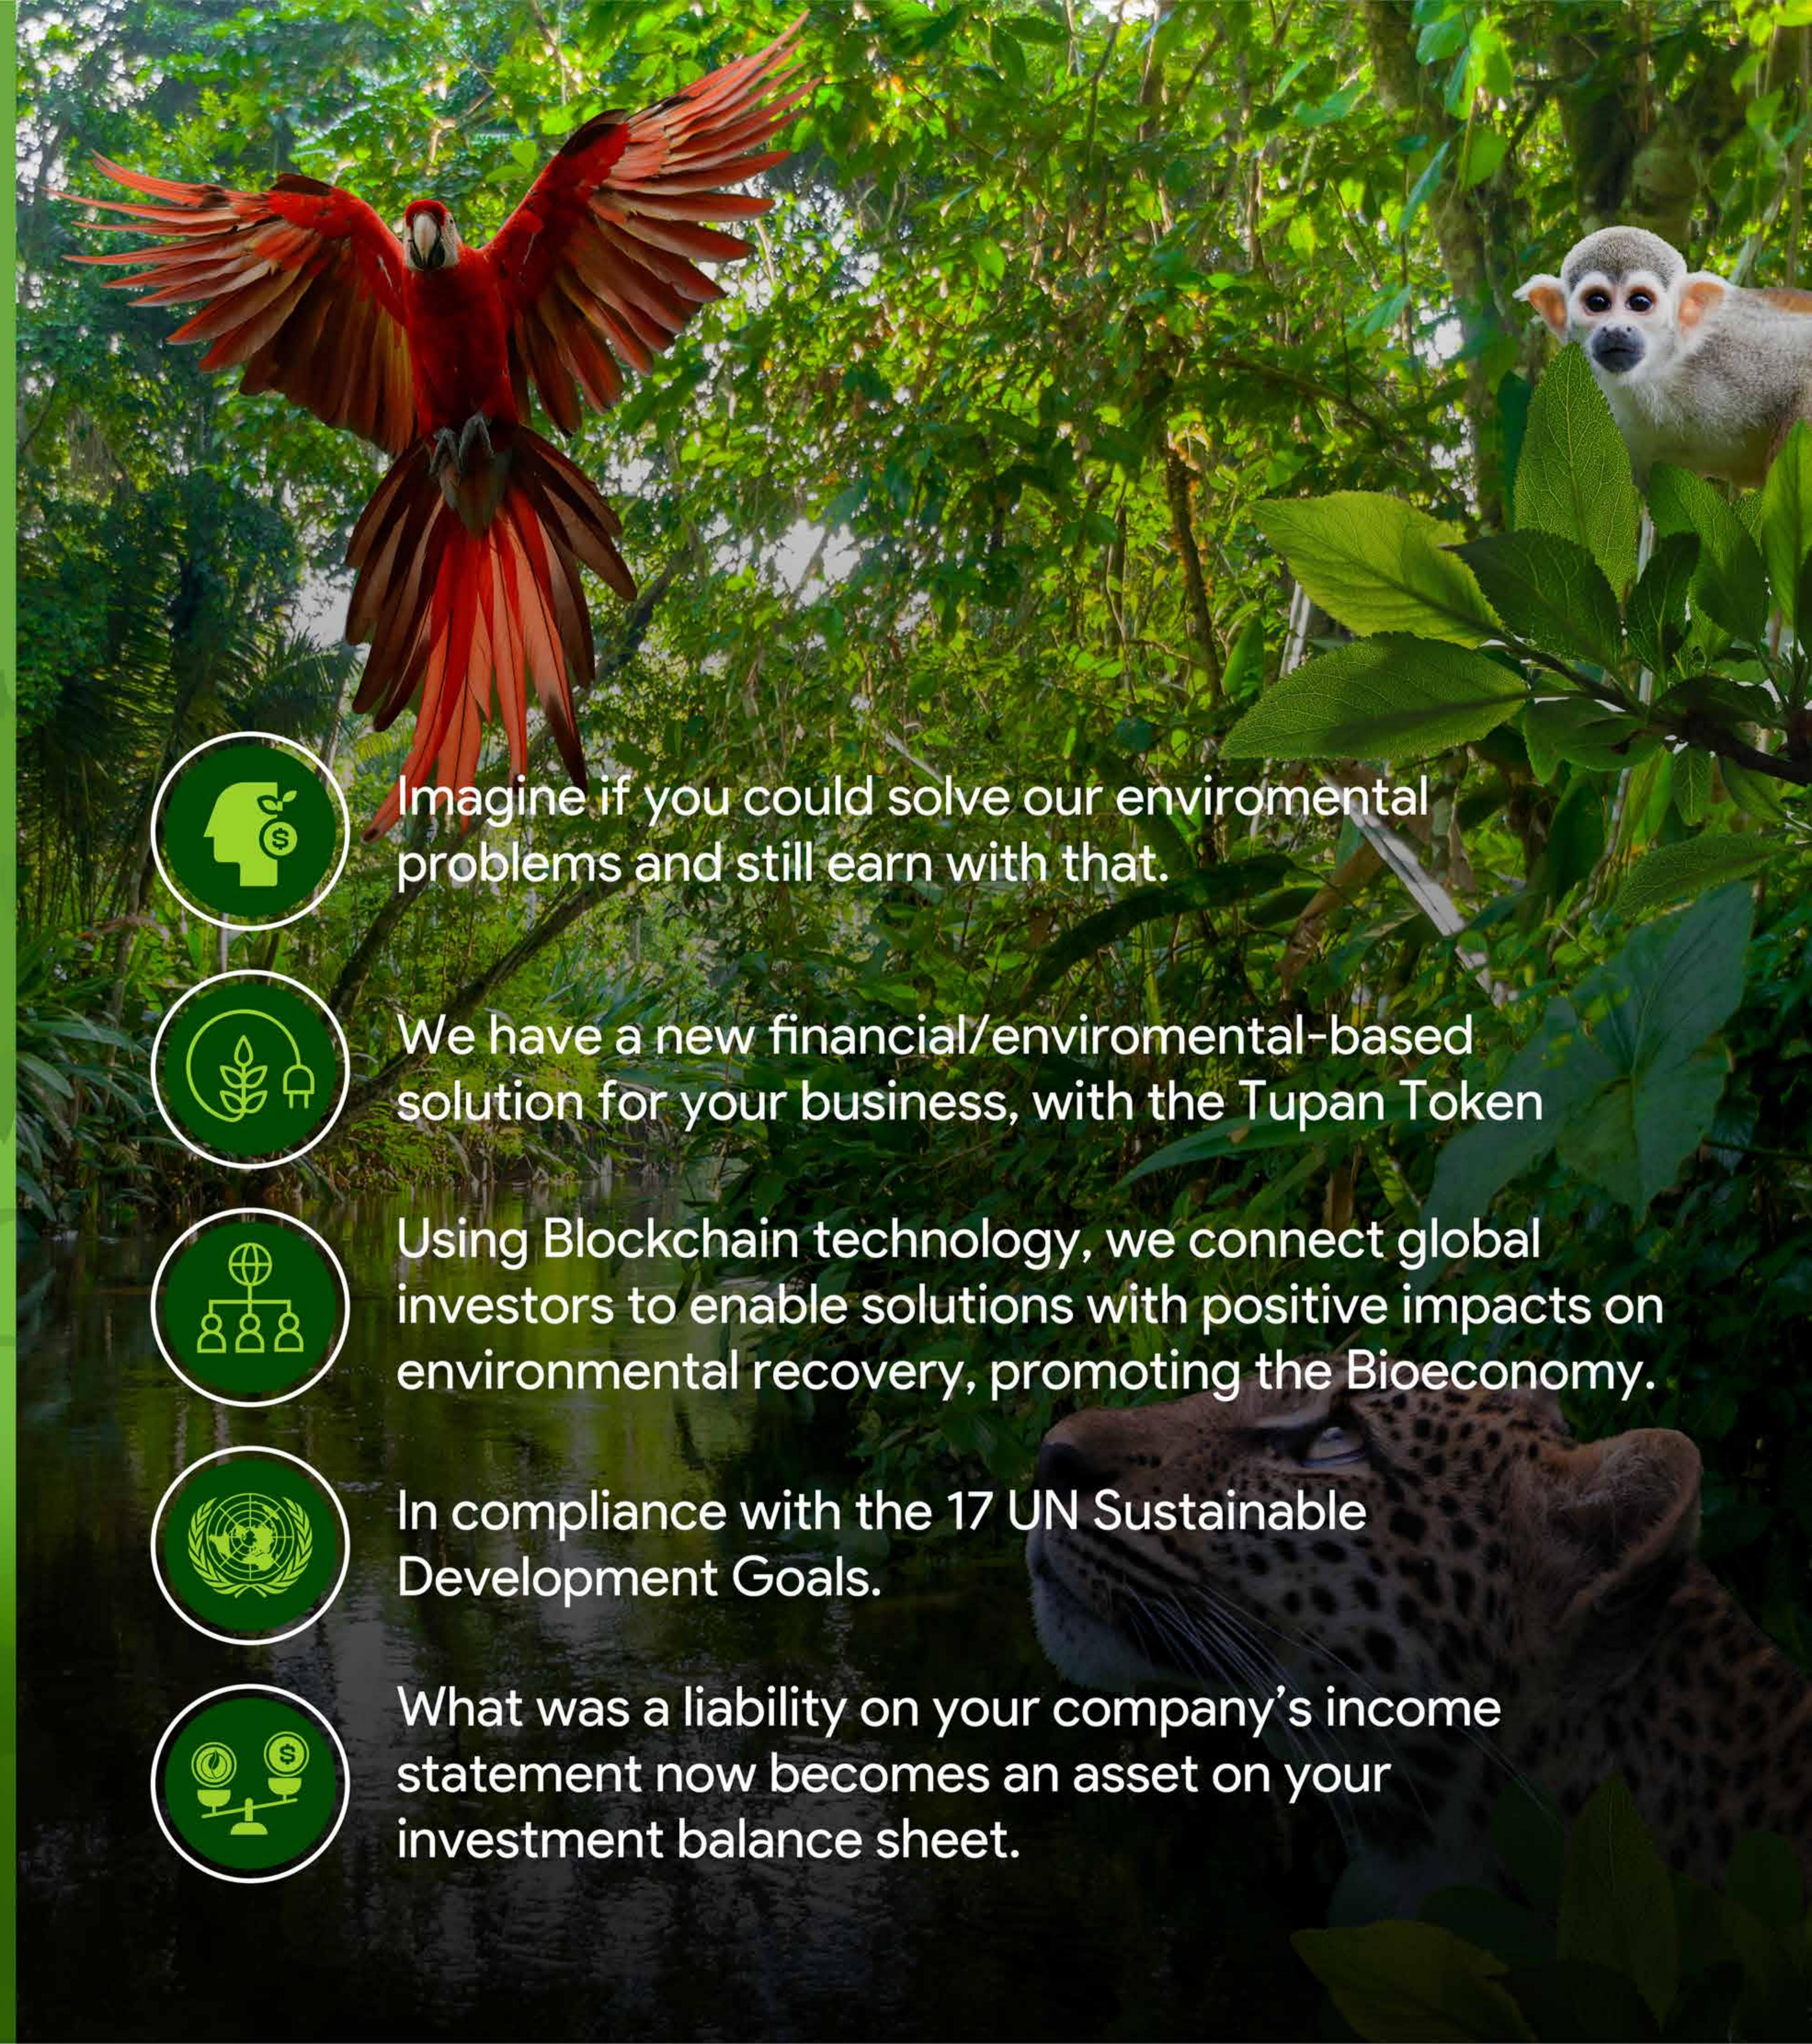

- Optimized devices with add on possibilities
- Very low electricity consumption
- Smartchain, unlimited project token mining capacity (access to other industries)
- More than 50,000 transactions per second (TPS)
- Accessibility to future new minting projects
- Multiple long-term minting and project results only with our community minting

Mining & Minting. Two examples of how a cryptocurrency can be generated.

# Tupan Minting

Get part of saving  
the earth

Imagine if you could solve our environmental problems and still earn with that.

We have a new financial/environmental-based solution for your business, with the Tupan Token

Using Blockchain technology, we connect global investors to enable solutions with positive impacts on environmental recovery, promoting the Bioeconomy.

In compliance with the 17 UN Sustainable Development Goals.

What was a liability on your company's income statement now becomes an asset on your investment balance sheet.

# TUPAN

**THE ULTIMATE GUIDE TO CARBON CREDITS AND CARBON OFFSETS**

**RACE TO NET ZERO**  
CARBON NEUTRAL GOALS BY COUNTRY

Which countries have made a carbon neutral pledge? This map tracks climate pledges by target year and level of commitment.

**Carbon Markets 101**

A carbon market allows investors and companies to buy and sell carbon credits simultaneously. This is also creating new market opportunities.

New challenges nearly always produce new opportunities. Climate crisis and rising global emissions are no exception. The renewed interest in carbon markets is due to the emergence of new regional markets like the European Union Emissions Trading System (EU ETS) and the California Carbon Cap-and-Trade Program.

Carbon credits can help protect the environment.

**NPUC**

## Global Carbon Credit Market Value (US\$Bn) Analysis and Forecast. 2017 - 2027

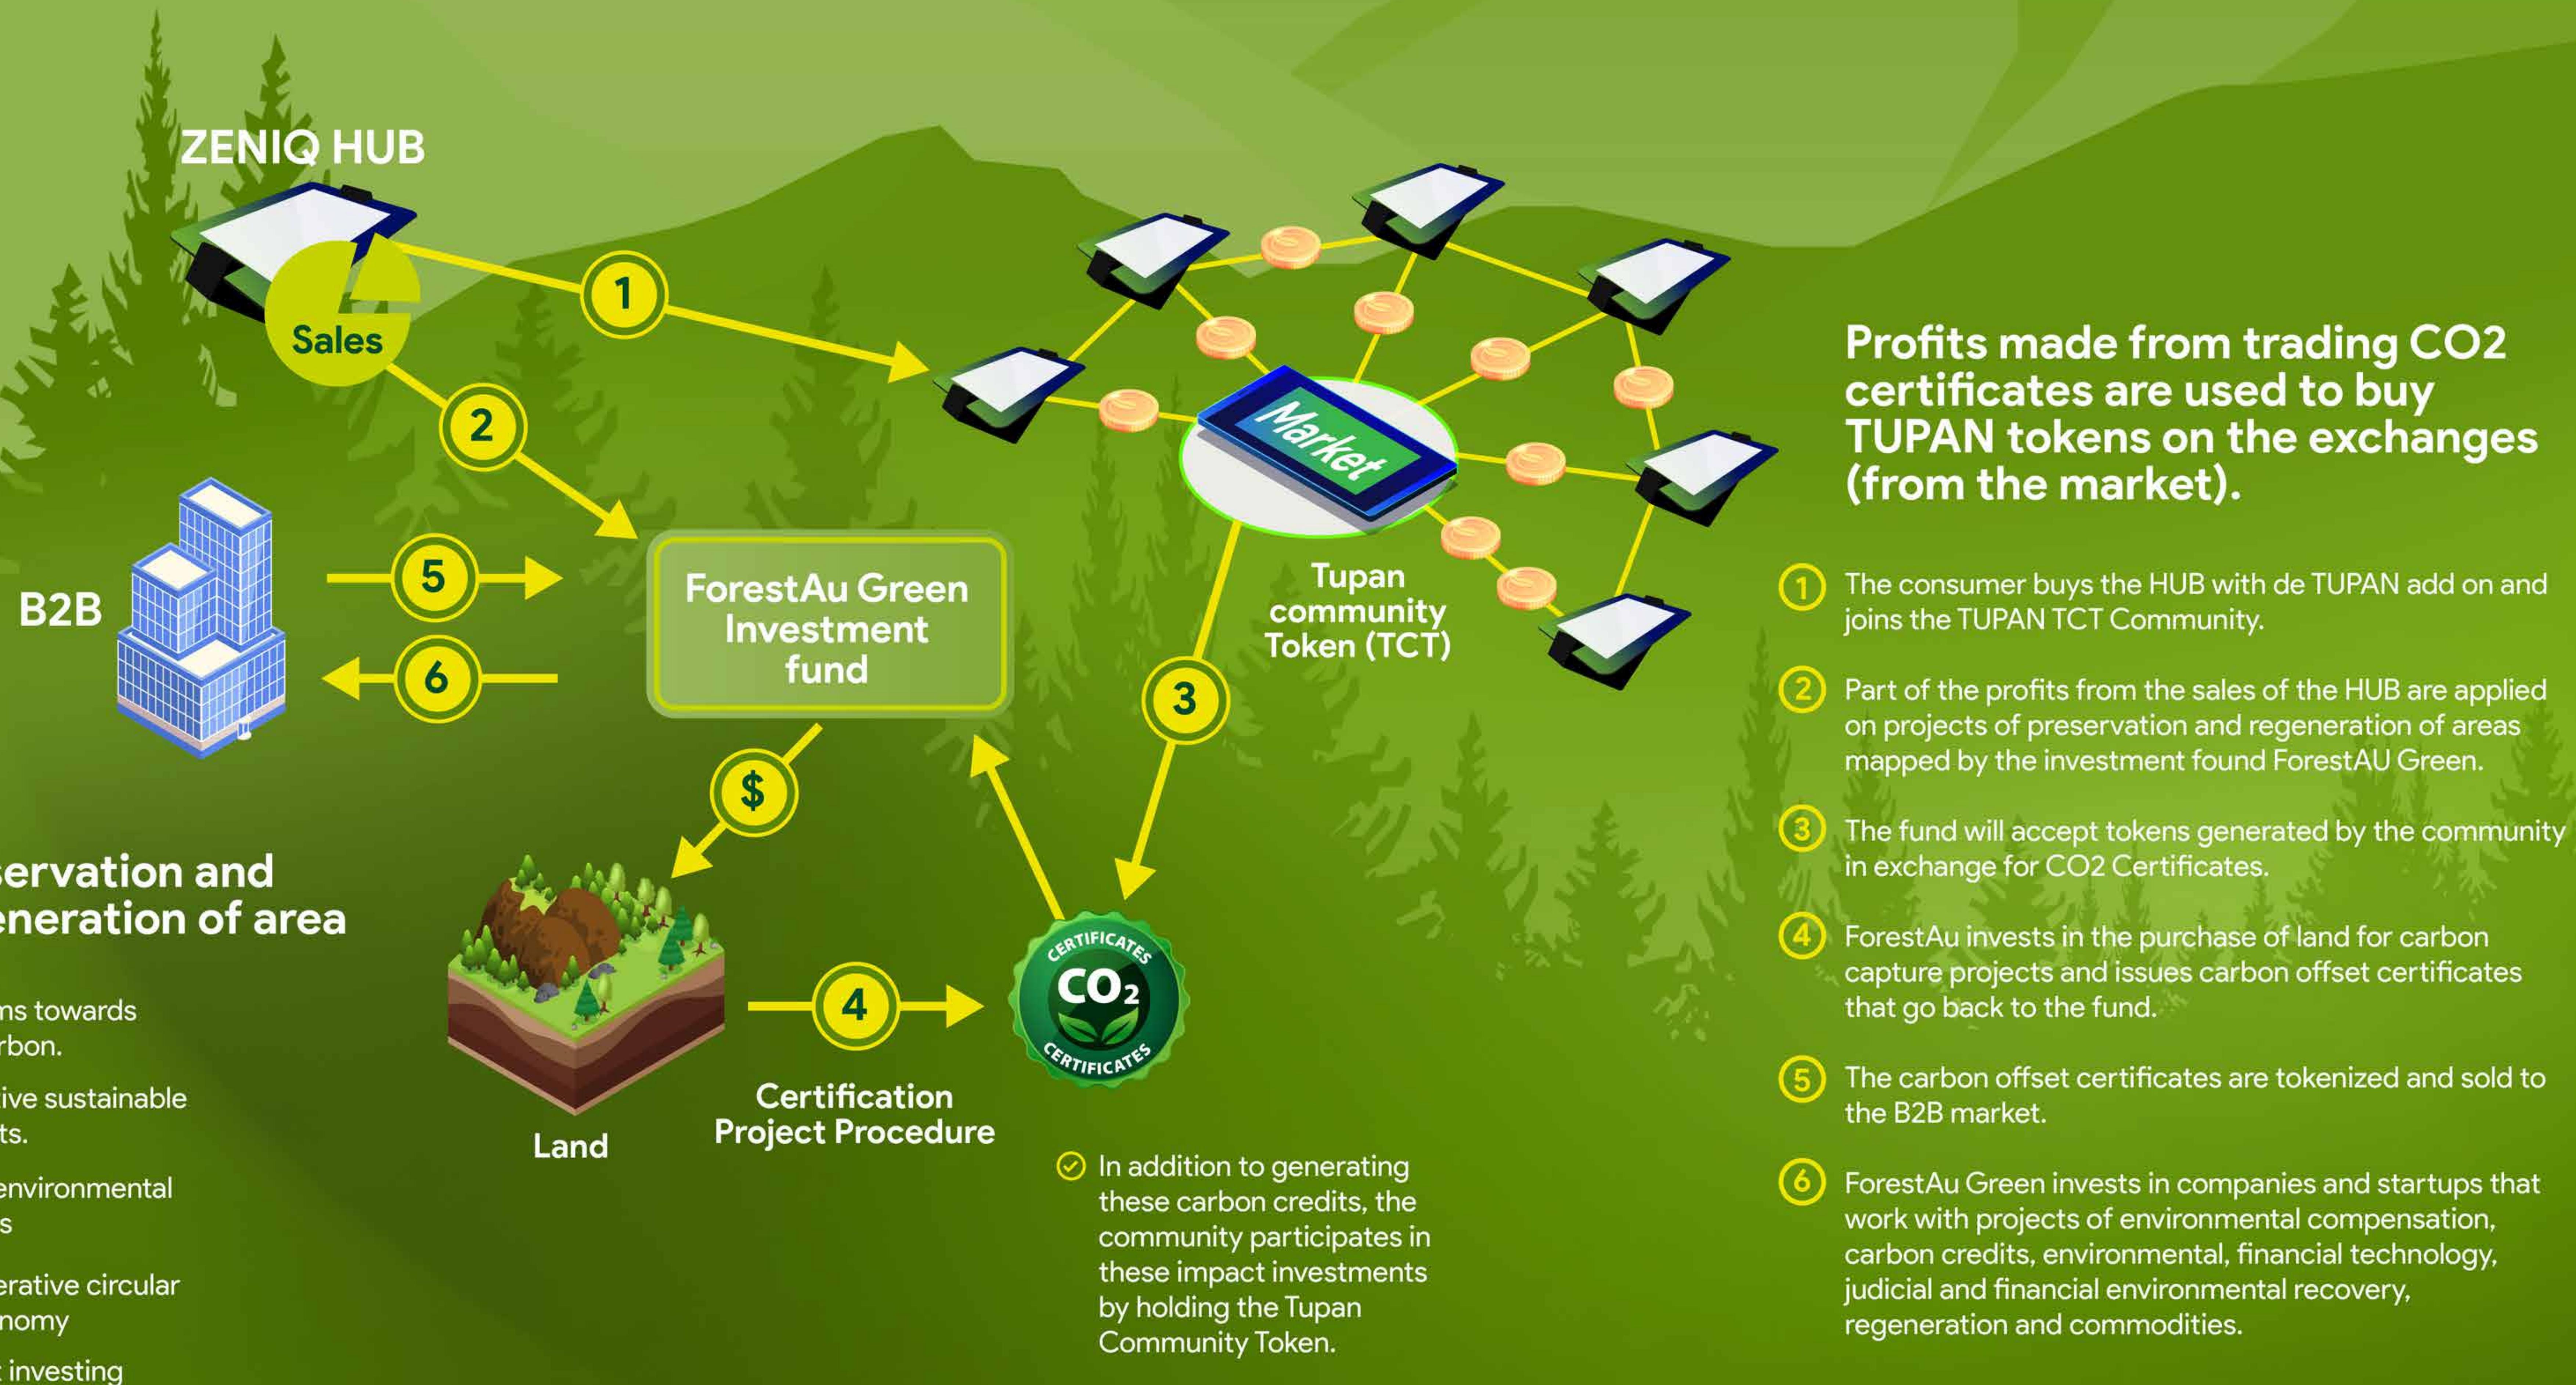

The global carbon credit market was valued at US\$ 211.5 Billion in 2019 and is expected to reach US\$ 2,407.8 Billion by 2027 a CAGR of 30.7% between 2020 and 2027

**Carbon credits create a monetary incentive for companies to reduce their carbon emissions.**

Those that cannot easily reduce emissions can still operate, at a higher financial cost. Carbon credits are based on the “cap-and-trade” model that was used to reduce sulfur pollution in the 1990s.

# Halving Overview TUPAN minting

The entire TUPAN Minting process takes place on the ZENIQ SmartChain, which can be viewed transparently at any time at the web address <https://smart.zeniq.net>

**Time Halving:** from the activation/purchase date of the Tupan Add-ons every year (for example: from the 10th of february to the next 10th of february) 50% less minted Tupan tokens /day.

**Sales Halving:** with each purchased add-on Tupan Add-ons, the minting factor is reduced. As a point of reference, the minting factor is reduced by around 1% for every 2,000 Add-ons according to the algorithm.

PLEASE NOTE: The above drawing is not to scale and is for illustrative purposes only.

Maximum supply, based on the maximum available number of Tupan Add-ons of 1.5 million nodes, will be around 10 billion Tupan tokens.

# DOUBLE INCENTIVE!

Celebrate the minting-start of TUPAN!

## Sharepoints for Performance Pool

Forty Percent Clause.  
The 40% clause states  
that any single  
Distribution line  
can contribute with a  
maximum of 40% to a  
Promoter's Total  
Performance. This is  
reported in the  
SAFIR online  
back office as  
so-called  
"performance".

# Performance Pool

## Performance Benefit

If the Promoter reaches a certain Career Rank, they can also claim Benefits from the so-called Performance Pool. The Performance pool is the 10% of the Total Effective Aggregate for the entire SAFIR network accumulated on a monthly basis and used to pay out the Performance Benefit to eligible Promoters.

If a Promoter reaches, for example, the Career Rank “Ruby”, they will receive one ① SharePoint. As a “Double Ruby”, two ② SharePoint; as a “Sapphire”, ten (10) SharePoint; and so on. These SharePoint represent a share of the respective amount that has accumulated in the Performance Pool in the specific month.

	Ruby		x1**
	Double Ruby		x2
	Sapphire		x10
	Double Sapphire		x20
	Black Sapphire		x40
	Diamond		x80
	Double Diamond		x110
	Triple Diamond		x150
	White Diamond		x225
	Double White Diamond		x300
	Gold Diamond		x400
	Double Gold Diamond		x500

SharePoints for the pool are adjusted to the respective performance reached.

\*Partitipation in world sales through performance benefit (products & services of all product categories)

\*\*Number of SharePoint per career rank.

# PERFORMANCE BENEFIT

The Performance Benefit is always calculated at the end of a calendar month and paid out to the qualifying Promoters no later than the 10th working day of the following month.

The calculation basis for the Performance Pool is the Total Effective Aggregate during one calendar month. 10% of the monthly Total Effective Aggregate is accumulated in the Performance Pool. This 10% is divided equally into three sub-pools.

Note: For a transparent overview, even in a current calendar month, all necessary parameters such as "how much is still missing in the performance to reach e.g. pool 3 in the respective month?" are displayed in your SAFIR Backoffice.

**Sub-pool 1:** The EURO amount in sub-pool 1 gets divided by the sum of all SharePoints of all Promoters in the respective month. This represents the SharePoint value of each SharePoint in sub-pool 1.

Sub-pool 2: Promoters who were able to increase their Performance by at least 4% (based on the total performance achieved (historical) at the end of the previous calendar month) in the respective month also qualify for sub-pool 2 with the amount of their achieved SharePoints. The EURO amount in sub-pool 2 is divided by the amount of SharePoints of Promoters who qualified for the sub-pool 2 in the respective month. This represents the SharePoint value of each SharePoint in sub-pool 2.

Sub-pool 3: Promoters who were able to increase their Performance by at least 8% (based on the total performance achieved (historical) at the end of the previous calendar month) in the respective month also qualify for sub-pool 3 with the number of their achieved SharePoints. The EURO amount in sub-pool 3 is divided by the number of SharePoints of Promoters who qualified for the sub-pool 3 in the respective month. This represents the SharePoint value of each SharePoint in sub-pool 3.

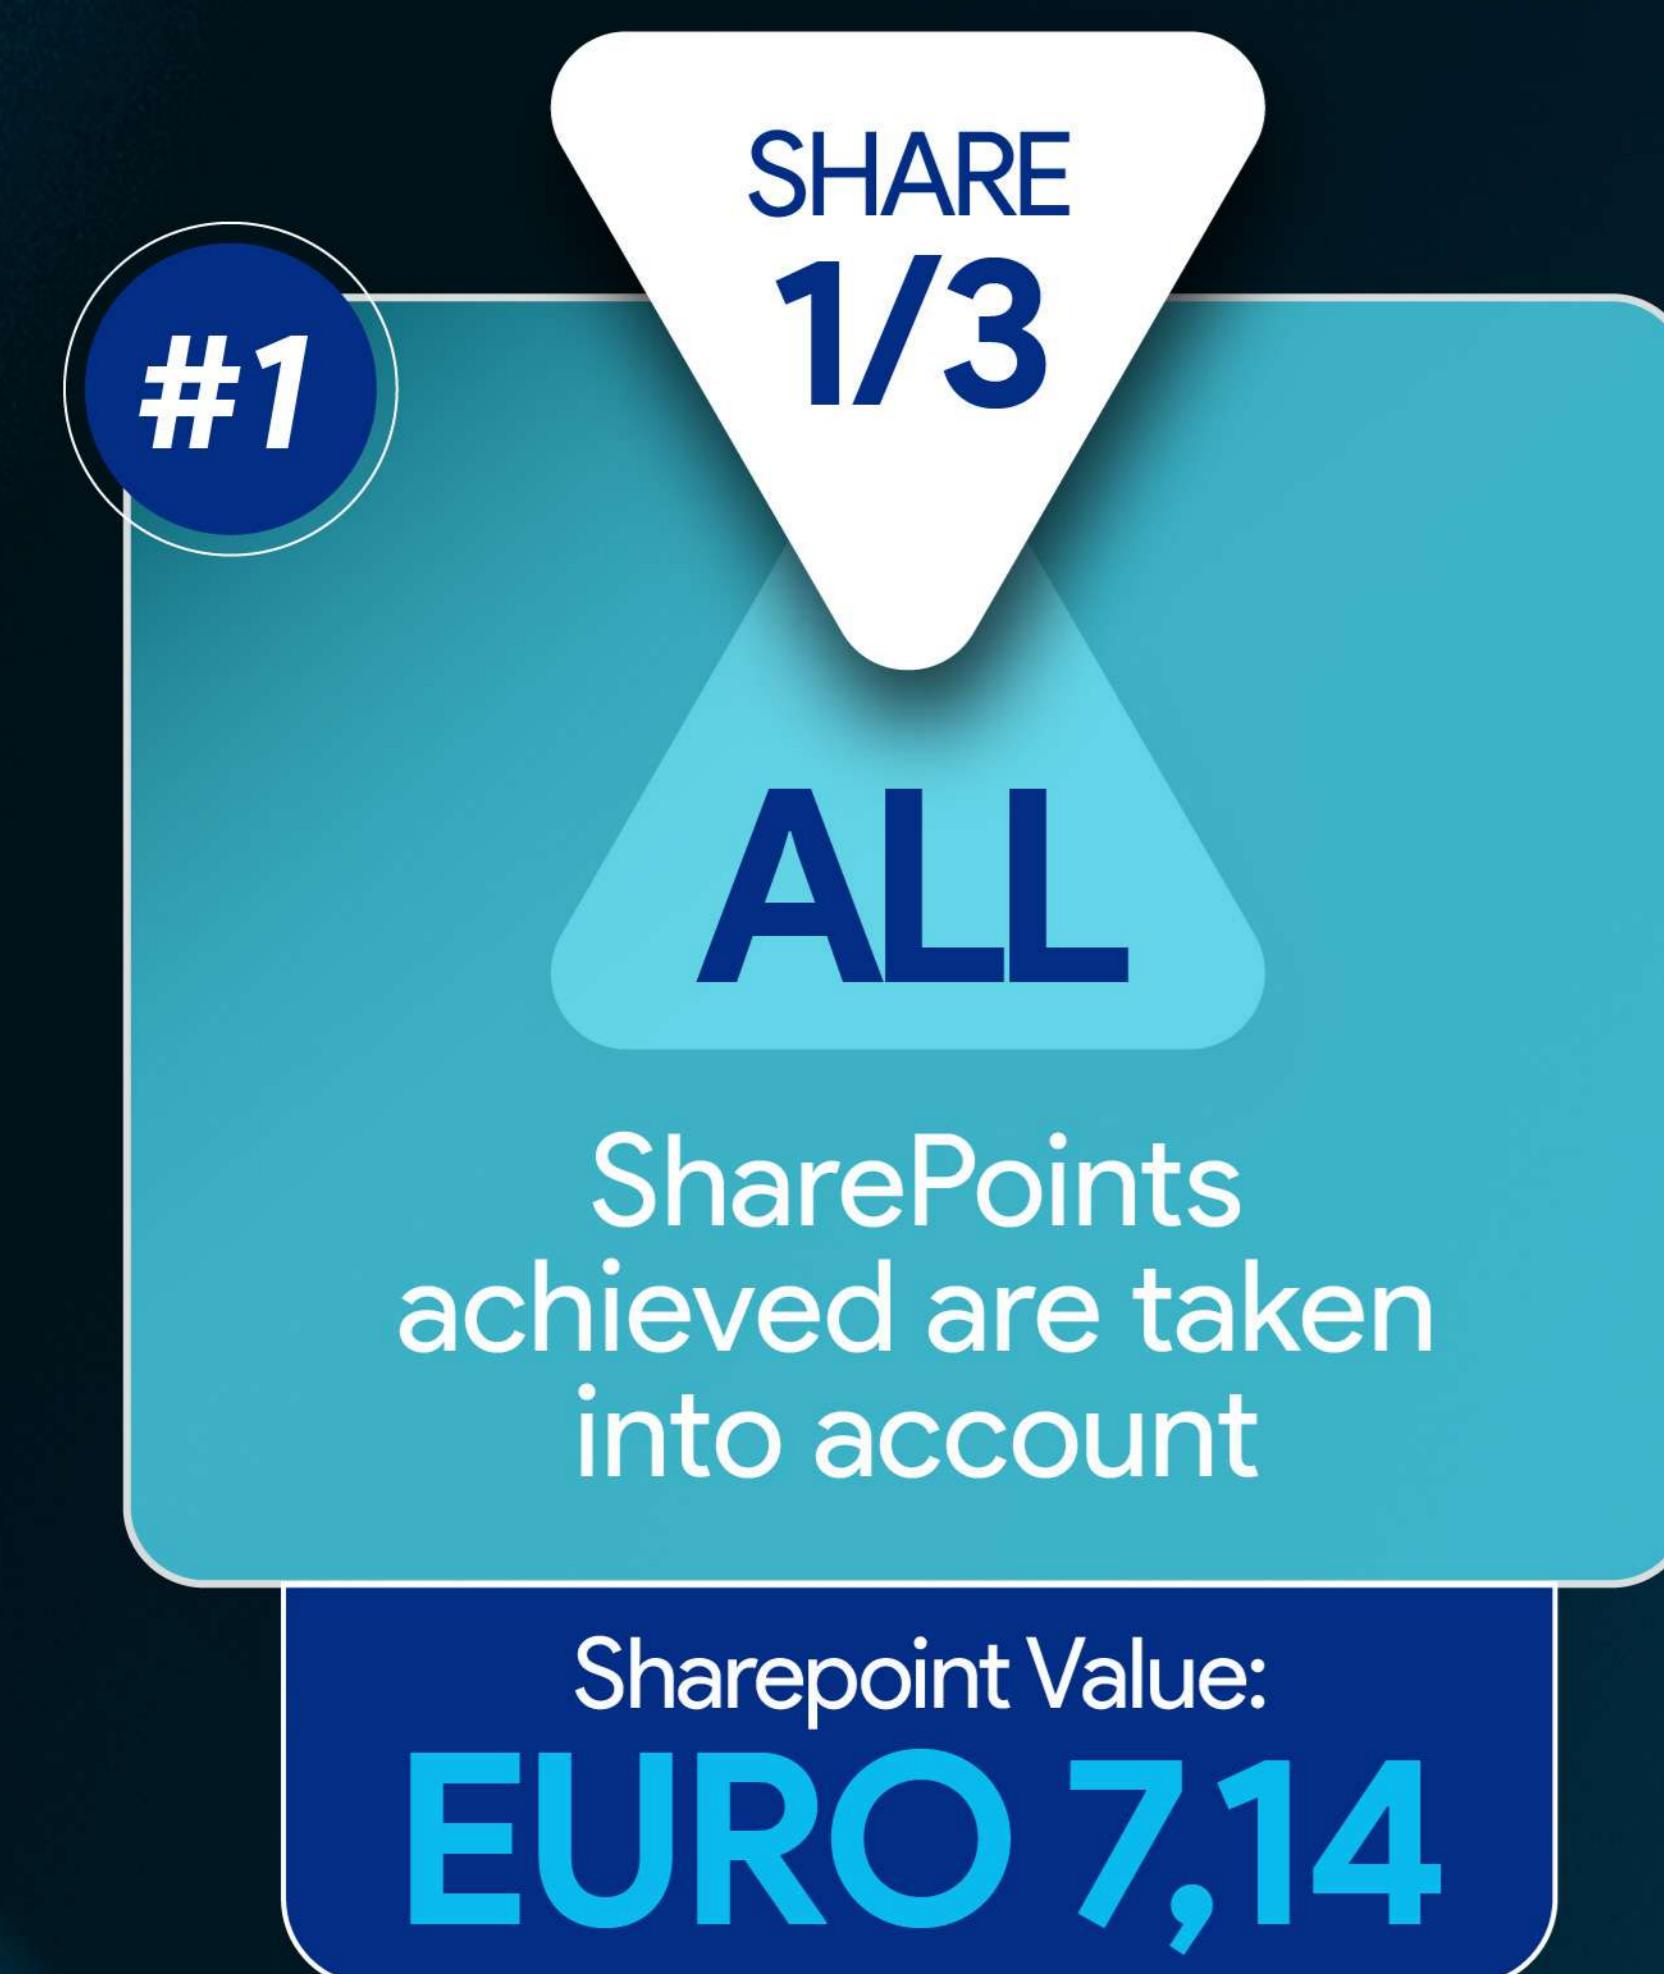

# PERFORMANCE BENEFIT

Activity pays off! The stronger the new performance within the respective month, based on the total performance achieved (historical) at the end of the previous calendar month, the more the own SharePoints can develop in value!

## EXAMPLE

Note: For a transparent overview, even in a current calendar month, all necessary parameters such as "how much is still missing in the performance to reach e.g. pool 3 in the respective month?" are displayed in your SAFIR Backoffice.

Note: Since the amount in the Performance Pool changes every month and therefore also the amounts in the 3 subpools as well as the number of qualified SharePoints per subpool, the values per SharePoint per pool also change.
